Black Rail remote broadcast unit programming

Adam Smith, USFWS Southeast Inventory and Monitoring (adam_d_smith@fws.gov)

15 November, 2018

1. **Determine sequence to program using up-to-date BLRA Remote Broadcast Unit Sequence List**

2. **Update the datetime of the timer.**

   a. Visit time.gov for current official time.
   b. While holding the ⏲ button, use the `D+` button to change day, the `H+` button to change hour, and the `M+` button to change minute, as necessary. If no button is pressed for 2 seconds while holding the ⏲ button, you will need to release the ⏲ button and push/hold it again to further adjust the day of week or time.

3. **Set the remote broadcast unit program.**

   a. Every sequence available in step 1 requires scheduling <u>four</u> `ON/OFF` programs. They <u>DO NOT</u> always occur on four consecutive days of the week. When programming a particular broadcast sequence, pay careful attention to the days of the week and the `ON/OFF` timing of the four programs.
   b. Programming begins by setting the `ON` time for the first program. Press the Ⓟ button to advance to the programming interface. The timer display should indicate `ON` and the number `1`.
   c. Repeatedly press the `D+` button until the correct day of the week for the first program is indicated.
   d. Set the appropriate `ON` time for the program using the `H+` and `M+` buttons.
   e. Press the Ⓟ button to advance and set the `OFF` time for program `1`, using steps 3c and 3d.
   f. Repeat steps 3b - 3e to set the `ON` and `OFF` times for programs 2 through 4.
   g. Press the ⏲ button when finished setting the `OFF` time for program 4.
   h. Repeatedly press Ⓟ to cycle through and double-check the days and `ON/OFF` times of the four programs against the expected broadcast sequence.
   i. Repeat step 3h. Not kidding. . .
